

Nutanix Beam: Multi-Cloud Management and Optimization

Deep Visibility Into Consumption

One Click Cost Optimization

Continuous Cloud Security and Compliance

Proactive Planning Recommendations

“Beam has made RI purchase & planning process very convenient for us. Now we have a better visibility & control on our cloud spend. Managing cloud is now simple with Beam”

-Ondrej Remes,
Director IT infrastructure, Avast Software

Many application and technology budget owners are surprised by the unexpectedly high costs of their cloud services. To prevent uncontrolled cloud spend and enable more accurate resource planning, cloud teams need better visibility of actual service consumption across all cloud environments.

Organizations often look to:

- Gain visibility and control of their consumption, eliminating unexpected high costs of cloud services
- Plan resource consumption effectively in order to increase utilization and reduce costs
- Govern cloud spend using simple yet comprehensive budgeting and chargeback mechanisms

THE NUTANIX BEAM SERVICE

Beam is a multi-cloud cost optimization service delivered by Nutanix to help organizations gain visibility into cloud spend across multiple cloud environments. Beam enables organizations to multi-cloud with freedom.

Cloud With Confidence - Cost Visibility and Cloud Optimization: Provides businesses with deep visibility into their multi-cloud environment and ability to optimize cloud with one-click. With Beam, you can set policies that continuously maintain high levels of cloud cost efficiency.

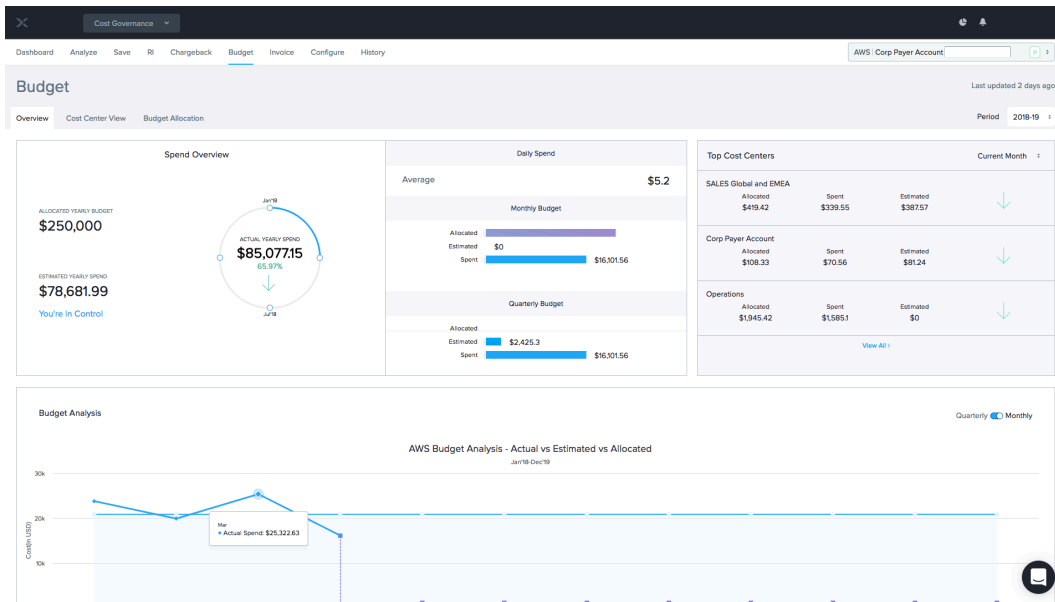

Cloud With Control - Centralized Financial Governance: Beam provides cloud operators and business owners with appropriate tools and controls to track overall cloud spend and map consumption to business units easily.

Cloud With Convenience - Intelligent Consumption Planning: Beam uses machine intelligence and recommendation algorithms to analyze workload patterns and continuously suggest optimal purchasing decisions for cloud resources.

Cloud With Security - Continuous Security Compliance: Beam enhances security management by automating cloud security compliance checks using built-in templates for security policies.

NUTANIX BEAM: FREEDOM TO CLOUD WITH CONFIDENCE, CONTROL, CONVENIENCE & SECURITY

Beam provides organizations with deep visibility and rich analytics detailing cloud consumption patterns, along with one-click cost optimization across their cloud environments. Beam proactively identifies idle and underutilized resources, and delivers specific recommendations to appropriately resize infrastructure services and ensure optimal consumption.

With Beam, multiple teams can visualize cloud consumption and directly enforce spend policies based on budgets and priorities, all from a single panel. Cloud operators are empowered with intelligent planning capabilities to make informed purchasing decisions based on application needs and business objectives.

Beam also automates cloud security compliance checks so that you can easily monitor your multi-cloud environment for security vulnerabilities. You can gain insights based on over 250 health checks using the built-in security policy templates and resolve vulnerabilities with a single click-to-fix remediation.

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform leverages web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution with rich machine intelligence. The result is predictable performance, cloud-like infrastructure consumption, robust security, and seamless application mobility for a broad range of enterprise applications.
